8:30 WELCOME, OVERVIEW AND INTRODUCTIONS

David Poole, General Counsel, Range Resources Corporation, Fort Worth, Texas

Barclay Nicholson, Fulbright & Jaworski L.L.P., Houston, Texas

---

8:45 PUBLIC RELATIONS AND SOCIAL ASPECTS OF SHALE PLAYS: HOW THEY INTERSECT WITH THE LAW

Oil and gas development in unconventional resources plays has brought oil and gas drilling and development close to many urban areas bringing a myriad of public concerns and issues.

Scott Segal, Bracewell & Giuliani LLP, Washington, D.C.

---

9:15 CHALLENGES FACED BY THE OIL AND GAS INDUSTRY TO PROTECT ENDANGERED WILDLIFE: DARTER FISH, PRAIRIE CHICKENS, AND SAGEBRUSH LIZARDS, OH MY!

The Endangered Species Act protects species who are in danger of extinction and conserves habitats on which endangered or threatened species depend. Developing oil and gas in areas where endangered species reside creates unique challenges to preserve the threatened species. What does the Endangered Species Act require? What are the oil and gas companies doing to protect these species?

Michael R. Goldman, Guida, Slavich & Flores, P.C., Dallas, Texas

Jesse Snyder, Law Clerk to The Hon. Jorge A. Solis, Dallas, Texas

---

9:45 BOLDLY FORECASTING OUR ENERGY FUTURE

Energy sources will continue to evolve and diversify as global energy demand surges. What is projected to be our primary fuel source in 2040? Will unconventional fuel supplies play a greater role in meeting energy demand? What will be the status of natural gas? What technologies will be used to develop our energy resources?

Kenneth P. Cohen, Vice President, Public & Government Affairs, ExxonMobil Corporation, Irving, Texas

---

10:30 BREAK

---

10:45 UPDATE ON STATE AND LOCAL REGULATION OF OIL AND GAS DEVELOPMENT

This presentation will provide a quick update on key developments regarding regulation of oil and gas operations at the state and local levels including bans on drilling moratoria, Pennsylvania Act 13 pre-emption issues, noise abatement, road usage, screening, permits, setbacks, and “best practices.”

Kevin Abbott, Reed Smith LLP, Pittsburgh, Pennsylvania

---

11:30 SEC IMPLICATIONS FOR UNCONVENTIONALS AND HYDRAULIC FRACTURING

The SEC has joined the ranks of federal and state legislators and regulators in taking a closer look at hydraulic fracturing. Media coverage of oil and natural gas drilling and hydraulic fracturing activities has cast doubt over the claimed productivity of natural gas wells and the accuracy of reported natural gas reserves. The SEC has issued subpoenas to several exploration companies and has begun formal investigations into the methods used to calculate and book gas reserves in shale plays. Companies can expect increased SEC scrutiny into a company’s reported performance of its shale gas wells, and whether projected performance and profitability is overstated to investors. Additionally shareholder groups have started to become more active. What should companies do to avert SEC scrutiny and possible penalties? Emphasizing transactional issues, we will look at the disclosures questioned by the SEC and discuss how to respond to these questions and those raised by shareholder groups.

Gerard G. Pecht, Fulbright & Jaworski L.L.P., Houston, Texas

**2:00 OIL & GAS LEASES IN THE ERA OF HORIZONTAL DRILLING AND HYDRAULIC FRACTURING**

Standard oil & gas leases which were originally drafted with vertical wells and vertical technology in mind are now being modified for use in horizontal drilling and hydraulic fracturing operations. Lease provisions effectuating a horizontally severed mineral or mineral leasehold estate should be included in these updated leases. What are retained acreage clauses, continuous development, and horizontal Pugh clauses? How should the shut-in royalty clause be modified? This panel will explore from both the lessor and lessee perspectives how to negotiate these issues. The panel will also review the current status of litigation concerning royalty payments.

There are 48 major shale basins in 32 countries outside the U.S. with technically recoverable resources of natural gas. This panel will discuss, investigate, and analyze the economics and legal issues surrounding the exploration, development, and production of natural gas from global shale basins in Argentina, Canada, Mexico, China, India, the United Kingdom, France, eastern Europe, and other areas around the world.

Will the price of natural gas in the U.S. be affected by exports? What is the position of Congress, the White House, manufacturers, and environmental groups on LNG exports? Given budgetary constraints and ever-increasing oilfield traffic, counties and local municipalities in the Eagle Ford and other shale plays throughout the United States are increasingly looking towards oil and gas operators to help fund infrastructure repairs. This topic will focus on the issues creating damage to roads and other infrastructure, an overview of permitting requirements in Texas and other shale play states, causes of action that might be asserted relating to infrastructure damage, and legal considerations when settling a claim or entering a road repair agreement with a municipality or county. Special emphasis will be placed on drafting considerations relating to infrastructure repair agreements with governmental entities, contractors and subcontractors.
